Professional Summary:

Data Analyst with 7+ years of experience specializing in data pipeline building, data visualization, and data transformation. Proven ability to leverage Python, SQL, and Microsoft Fabric to increase efficiency and create insights into data. Developed queries in Python to pull and transform data for visualization and data pipeline construction. Utilized SQL to query and pull client data to transform it into an easy-to-digest format. Built dashboards in PowerBI for clients and internal research purposes.

Skills/Qualifications:

- Data aggregation and updating with SQL (mostly PostgreSQL, familiar with others)
- Creation of reports/visualizations in Tableau, PowerBI, and Plotly
- Data modeling and data warehouse techniques through Microsoft Fabric
- Data manipulation/analysis, visualization, and forecasting through Python
- Agile development process
- Advanced knowledge of Microsoft Excel, including VBA, pivot tables, and advanced formulas
- Strong leadership, communication, and teamwork developed through working in a small company and managing a direct report.

Experience:

Sr. Financial and Data Analyst, iGrad, San Diego, CA — February 2024 – Present

- Financial Fitness Group recently merged with Aztec Software subsidiary iGrad. iGrad is an enterprise software company that offers a platform to empower students, alumni, staff, parents and families to make effective personal finance, student loan, and career decisions throughout their lives.
- Created data pipelines in Microsoft Fabric, using Python and SQL to perform complex joins and transformations; currently utilizing said data to create various Impact Data reports and automating the Morningstar Financial Communications Library.
- Developed semantic models utilizing star schemas for report creation, using DAX functions to add additional calculated elements for deeper insights into the data.
- Utilized SQL Server Management Studio to QA our work to ensure the utmost accuracy in the data we were transforming.

Sr. Financial and Data Analyst, Financial Fitness Group, San Diego, CA — September 2019 – February 2024

- Financial Fitness Group is an enterprise software company that provides financial education solutions designed to maximize user engagement
- Joined Financial Fitness Group as a Financial and Data Analyst in September 2019, promoted within 3 years to Sr. Financial and Data Analyst and now manage a direct report, providing guidance and leadership for various projects such as the Financial Communications library production.
- Lead the creation and QA of our Morningstar Financial Communications library, which is an annual update that includes over 200 static images and 18 presentations that financial advisors utilize to convey various financial topics to their clients.
- Wrote SQL queries to pull and transform client performance data in our education platform and compile it into an easy to digest report on a monthly and ad hoc basis.
- Created and ran a financial model for sales executive team and accounting that reads a Salesforce export and breaks down all contracts by month, applying revenue sharing percentage depending on multiple factors such as the year and who billed the contract.

- Developed Python scripts for ad-hoc data projects such as data migrations, web scrapes, ETL pipelines, Publish/Subscribe models, and more. In writing these scripts, was able to automate tasks, validate data, upload data to Mongo, and interface with vendor API's.
- Wrote Python scripts to connect our content to OpenAI 3.5's capabilities, training it to answer questions and make recommendations based off the courses and articles in our system.

Actuarial Intern, LifeCare Assurance, Woodland Hills, CA June 2016 – August 2017

- LifeCare Assurance is company that helps clients expand their product portfolios with innovative long-term reinsurance products.
- Used SQL to create CRM, Monthly Performance, and other ad hoc interactive and customizable dashboards in Tableau (data visualization software).
- Wrote Excel macros to automate daily manual processes into ten minutes exercises.
- Organized, cleaned, and entered data with pivot tables, nested if statements, index/matches, etc.

Education:

University of California, San Diego Graduated June 2019

B.S. Mathematics and Economics Joint Major, Business Minor (Specialization in Finance)
